

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph from page 11, lines 3-16 with the following replacement paragraph:

a1
If the called party has subscribed to caller ID services, the method follows the "Yes" branch to step 325 and the terminating switch 12 sends a query to the SCP 42 for caller identification information, if any, associated with the telephone number of the calling party. At step 330, the SCP queries the [[CNAN]] CNAM database 246 for caller identification information, if any, associated with the telephone number of the calling party. As will be appreciated by those skilled in the art, the SCP may also have to query other SCP's or other databases to obtain caller identification information, if any, associated with the calling party. If the SCP 42 locates caller identification information associated with the telephone number of the calling party, the SCP 42 forwards the caller identification information to the terminating switch 12. If, however, the telephone number of the calling party is marked as private or unlisted, or if the SCP 42 is unable to locate caller identification information associated with the telephone number of the calling party, a message will be forwarded to the terminating switch 12 that the telephone number of the calling party is private, unlisted, or unavailable.
